Forecaster: Henz, D.
Phone: 602-506-8701 (Alert Room), 602-768-2000 (Cell)

MESSAGE 1 ALERT UPDATE

Comments:

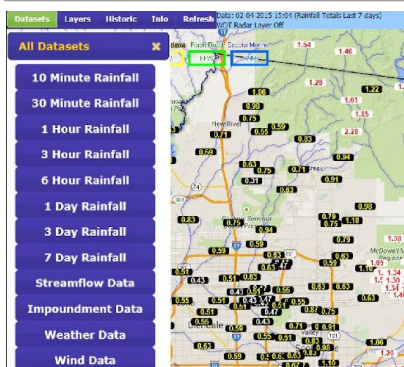

A large cluster of strong/severe thunderstorms continue to slowly move west/southwest across the Wickenburg Forecast Zone. The strongest storms in this cluster will be capable of a quick of 0.75"-1.00" before moving through the US 60/93 corridor which matches local rain gages in the area. Gusty winds around 40mph and frequent lightning strikes will also accompany these storms. Normally dry washes may begin to flow in parts of the zones as well as ponding of water on streets and in low lying areas. We will continue to keep a close eye on local washes within the area for excessive runoff though given how fast storms are moving widespread runoff is not expected at this time. Further updates will be issued as necessary.
